China → Constantine · via ALG air / Skikda sea · clearance by Direction Générale des Douanes, Algeria

Cargo handling on the China–Constantine lane.

We move freight cargo from South China into Constantine through ALG air / Skikda sea. Constantine is eastern regional capital, which shapes the kind of cargo that moves on this lane and how it should be packed.

The clearing authority is Direction Générale des Douanes, Algeria. Historical dwell on this gateway is around 10–20 days, and it lengthens in Sep–Nov.

How this lane actually runs

Algeria protects domestic production aggressively, and the additional safeguard duty on finished consumer goods can dwarf the base tariff. Every commercial import also has to be domiciled with an Algerian bank before shipment, which links the logistics

timetable to the consignee's banking arrangements. Treat the license and domiciliation as the critical path.

Air gateways used	ALG (Algiers), ORN (Oran)
Air transit, China to gateway	5-8 business days
Sea gateways used	Algiers, Oran, Béjaïa
Sea transit, China to gateway	24-32 calendar days
Gateway serving Constantine	ALG air / Skikda sea
Inland leg to Constantine	+1 day from the gateway
Typical clearance / dwell	10-20 days
Peak season to plan around	Sep-Nov

Duty, tax and clearance into Constantine

Imports into Algeria are cleared by Direction Générale des Douanes, Algeria. The headline position is: VAT 19%; duty 5-60%, plus additional safeguard duty (DAPS) of up to 200% on some consumer goods. The de-minimis threshold is No practical de-minimis for commercial cargo.

Conformity is the part most first-time importers underestimate: Certificate of conformity and bank domiciliation of the import contract required before shipment. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Algeria: Bank domiciliation of the import contract is mandatory before shipping. DAPS safeguard duty applies to a long list of finished goods. Import bans and quotas on certain categories change with policy — verify at booking.

Handling on the ALG air / Skikda sea routing serving Constantine.

Air, sea or overland into Constantine?

Mode	Transit to gateway	Best suited to
→ Air Freight	5–8 business days	time-critical, high-value and low-volume cargo
☐ Sea Freight	24–32 calendar days	volume cargo where cost per kilo matters more than speed

Transit shown is China departure to the Algeria gateway and excludes the +1 day inland leg to Constantine and 10–20 days of clearance.

Pre-shipment checklist for Constantine

- Check the de-minimis position (No practical de-minimis for commercial cargo) against your invoice value before you decide how to split the shipment.
- Confirm the consignee in Constantine can act as importer of record — Direction Générale des Douanes, Algeria will not release cargo to an unregistered party.
- Compare gross weight against volumetric weight ($L \times W \times H \div 6000$) — the higher figure is what gets billed on air and express.
- Put the Constantine delivery address, contact name and phone number on the invoice, not just the packing list.
- Declare lithium batteries, magnets, liquids and powders up front — retro-declaring after booking usually means re-planning the whole shipment.
- Book earlier than the transit time suggests during Sep–Nov, when space on this lane tightens.

Frequently asked questions

How long does shipping from China to Constantine take?

China to the Algeria gateway is 5–8 business days by air, 24–32 calendar days by sea. On top of that, allow 10–20 days of clearance with Direction Générale des Douanes, Algeria and a +1 day inland leg to Constantine.

What duty and tax will I pay importing into Constantine?

Direction Générale des Douanes, Algeria applies: VAT 19%; duty 5–60%, plus additional safeguard duty (DAPS) of up to 200% on some consumer goods. The de-minimis position is No practical de-minimis for commercial cargo. Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Constantine.

When is the busiest time on the China–Algeria lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year in January or February and Golden Week in early October. Book one to two weeks earlier in those periods.

Is sea freight cheaper than air freight into Constantine?

Per kilo, yes — usually by a wide margin. The trade-off is time: 24–32 calendar days by sea versus 5–8 business days by air to the Algeria gateway, before clearance and the +1 day inland leg. The crossover point is normally somewhere between 100 and 300 kg depending on the density of your cargo.

How is the chargeable weight calculated for Constantine?

We compare actual gross weight against volumetric weight — length × width × height in centimeters divided by 6000 for air — and bill the greater of the two, rounded up to the next kilogram. Light, bulky cargo is almost always billed on volume.

What certification do I need for Algeria?

For regulated goods, plan for: Certificate of conformity and bank domiciliation of the import contract required before shipment.

Missing conformity paperwork is the single most common cause of a hold, and in most cases it cannot be remedied once the cargo has arrived.

Checking the Algeria duty position yourself

Duty and tax figures on this page are planning estimates. The binding assessment is made by Direction Générale des Douanes, Algeria against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Most landed-cost surprises trace back to classification rather than freight. [the WCO Harmonized System](#) defines the heading structure every customs administration builds on, and [ITC Market Access Map](#) will show you the duty a given heading attracts in this destination.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

Watch: the process behind this route
