Middle East

China → Sulaymaniyah · via ISU air / Umm Qasr sea · clearance by General Commission of Customs, Iraq

Cargo handling on the China-Sulaymaniyah lane.

For buyers shipping into Sulaymaniyah, the practical question is not the ocean or flight time but what happens after arrival. Sulaymaniyah is second Kurdistan Region commercial center; cargo enters through ISU air / Umm Qasr sea, and allow +3 days for the inland leg on top of clearance.

Clearance itself is handled by General Commission of Customs, Iraq, and typical dwell at the gateway runs 7-15 days.

What you will pay on arrival in Iraq

General Commission of Customs, Iraq assesses duty and tax on cargo arriving for Sulaymaniyah consignees. Current regime: Customs duty 0.5-30% plus a reconstruction levy; regional variations apply in the Kurdistan Region, with a de-minimis position of No practical de-minimis.

Conformity is the part most first-time importers underestimate: Certificate of Conformity (COC) issued pre-shipment under the Iraqi conformity program is mandatory for most goods. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Iraq: A pre-shipment COC is mandatory for most commercial goods; cargo arriving without it faces heavy penalties. Security and route conditions affect inland delivery. Confirm which customs administration applies to the final destination.

How this lane actually runs

Umm Qasr is the sea gateway for federal Iraq, while the Kurdistan Region is more often served by air into Erbil or overland from Turkey and Iran. The two administrations apply customs differently, so the destination city changes the process — not just the trucking leg. A pre-shipment Certificate of Conformity is the single most important document on this lane.

Air gateways used	BGW (Baghdad), EBL (Erbil), BSR (Basra)
Air transit, China to gateway	4–7 business days
Sea gateways used	Umm Qasr
Sea transit, China to gateway	20–30 calendar days
Gateway serving Sulaymaniyah	ISU air / Umm Qasr sea
Inland leg to Sulaymaniyah	+3 days from the gateway
Typical clearance / dwell	7–15 days
Peak season to plan around	Sep–Nov

Handling on the ISU air / Umm Qasr sea routing serving Sulaymaniyah.

What to sort out before the cargo leaves China

- Put the Sulaymaniyah delivery address, contact name and phone number on the invoice, not just the packing list.
- Book earlier than the transit time suggests during Sep-Nov, when space on this lane tightens.
- Get the conformity paperwork moving early: Certificate of Conformity (COC) issued pre-shipment under the Iraqi conformity program is mandatory for most goods.
- Plan around the China-side windows too: Chinese New Year and Golden Week both compress capacity on the Iraq lane.
- Check the de-minimis position (No practical de-minimis) against your invoice value before you decide how to split the shipment.
- Budget for the inland leg: +3 days beyond gateway clearance to reach Sulaymaniyah.

Air, sea or overland into Sulaymaniyah?

Mode	Transit to gateway	Best suited to
➔ Air Freight	4-7 business days	time-critical, high-value and low-volume cargo
🚢 Sea Freight	20-30 calendar days	volume cargo where cost per kilo matters more than speed

Transit shown is China departure to the Iraq gateway and excludes the +3 days inland leg to Sulaymaniyah and 7-15 days of clearance.

Frequently asked questions

How long does shipping from China to Sulaymaniyah take?

China to the Iraq gateway is 4–7 business days by air, 20–30 calendar days by sea. On top of that, allow 7–15 days of clearance with General Commission of Customs, Iraq and a +3 days inland leg to Sulaymaniyah.

What duty and tax will I pay importing into Sulaymaniyah?

General Commission of Customs, Iraq applies: Customs duty 0.5–30% plus a reconstruction levy; regional variations apply in the Kurdistan Region. The de-minimis position is No practical de-minimis. Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Sulaymaniyah.

What certification do I need for Iraq?

For regulated goods, plan for: Certificate of Conformity (COC) issued pre-shipment under the Iraqi conformity program is mandatory for most goods. Missing conformity paperwork is the single most common cause of a hold, and in most cases it cannot be remedied once the cargo has arrived.

Can you deliver door-to-door in Sulaymaniyah?

Yes. Delivery to a Sulaymaniyah address is quoted as one figure covering freight, duty and tax owed to General Commission of Customs, Iraq, and the +3 days inland leg. Confirm whether your consignee wants the goods at a warehouse, a marketplace fulfillment center or a shop front, because the last-mile requirement differs.

Which port or airport does cargo for Sulaymaniyah clear through?

Cargo for Sulaymaniyah is routed via ISU air / Umm Qasr sea. Sea gateways for Iraq are Umm Qasr; air gateways are BGW (Baghdad), EBL (Erbil), BSR (Basra). We pick whichever gives the shortest total door time for your address.

Can you ship batteries or sensitive cargo to Sulaymaniyah?

Yes. Battery cargo by air follows IATA PI 965–970 depending on how the cells are packed, and moves on certified channels via BGW (Baghdad), EBL (Erbil), BSR (Basra). Surcharges apply and the declaration has to be made before booking.

Checking the Iraq duty position yourself

Duty and tax figures on this page are planning estimates. The binding assessment is made by General Commission of Customs, Iraq against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

If you want to sanity-check a duty figure yourself, start from the heading rather than the product name — [the WCO Harmonized System](#) is the underlying nomenclature, and [the WTO Tariff & Trade Data portal](#) holds the applied rates by country pair.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

On the origin side, export declaration and any commodity inspection requirement fall under [China Customs \(GACC\)](#); we handle that filing as part of the service, but the requirement is theirs, not ours.

For a wider view of how importing into Iraq actually works — documentation norms, inspection behavior, the paperwork that tends to hold shipments — the [U.S. ITA guide to Iraq customs regulations](#) is a useful independent read alongside our own lane notes.

Watch: the process behind this route
