Sea Freight

China → Le Tampon · via RUN air / Port Reunion sea · clearance by Douane française (EU customs territory)

Cargo handling on the China-Le Tampon lane.

For buyers shipping into Le Tampon, the practical question is not the ocean or flight time but what happens after arrival. Le Tampon is interior highland municipality; cargo enters through RUN air / Port Reunion sea, and allow +1 day for the inland leg on top of clearance.

The clearing authority is Douane française (EU customs territory). Historical dwell on this gateway is around 3–8 days, and it lengthens in Sep–Nov.

Duty, tax and clearance into Le Tampon

Douane française (EU customs territory) assesses duty and tax on cargo arriving for Le Tampon consignees. Current regime: Reduced VAT of 8.5% plus octroi de mer — a local dock due of 6.5–60% that is unique to the French overseas departments, with a de-minimis position of EUR 150 for duty; VAT applies from the first euro.

Conformity is the part most first-time importers underestimate: CE marking under EU rules; French labeling requirements. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Reunion: Octroi de mer is the dominant cost element and varies by product and local production status. EU rules otherwise apply in full, including CE marking and French labeling.

How this lane actually runs

Réunion is part of the EU customs territory, so EU tariff and CE marking rules apply — but the octroi de mer dock due, which does not exist in mainland France, can add far more to landed cost than the customs duty itself. Its rate depends on whether an equivalent product is made locally, so classification research genuinely pays here.

Sea gateways used	Port Réunion (Le Port)
Sea transit, China to gateway	24–34 calendar days
Gateway serving Le Tampon	RUN air / Port Reunion sea
Inland leg to Le Tampon	+1 day from the gateway
Typical clearance / dwell	3–8 days
Peak season to plan around	Sep–Nov

Handling on the RUN air / Port Reunion sea routing serving Le Tampon.

Pre-shipment checklist for Le Tampon

- Confirm the consignee in Le Tampon can act as importer of record — Douane française (EU customs territory) will not release cargo to an unregistered party.
- Get the conformity paperwork moving early: CE marking under EU rules; French labeling requirements.
- Book earlier than the transit time suggests during Sep–Nov, when space on this lane tightens.
- Use ISPM-15 treated pallets. Untreated wood is the most common reason otherwise-clean cargo gets held.
- Check the de-minimis position (EUR 150 for duty; VAT applies from the first euro) against your invoice value before you decide how to split the shipment.
- Budget for the inland leg: +1 day beyond gateway clearance to reach Le Tampon.

Frequently asked questions

How long does shipping from China to Le Tampon take?

China to the Reunion gateway is 24–34 calendar days. On top of that, allow 3–8 days of clearance with Douane française (EU customs territory) and a +1 day inland leg to Le Tampon.

What duty and tax will I pay importing into Le Tampon?

Douane française (EU customs territory) applies: Reduced VAT of 8.5% plus octroi de mer — a local dock due of 6.5–60% that is unique to the French overseas departments. The de-minimis position is EUR 150 for duty; VAT applies from the first euro. Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Le Tampon.

What certification do I need for Reunion?

For regulated goods, plan for: CE marking under EU rules; French labeling requirements. Missing conformity paperwork is the single most common cause of a hold, and in most cases it cannot be remedied once the cargo has arrived.

What documents does Douane française (EU customs territory) require?

A commercial invoice with HS codes, a packing list, the bill of lading or air waybill, a certificate of origin where it lowers duty, and any product certification (CE marking under EU rules; French labeling requirements). We prepare and file these as part of the service.

Which port or airport does cargo for Le Tampon clear through?

Cargo for Le Tampon is routed via RUN air / Port Reunion sea. Sea gateways for Reunion are Port Réunion (Le Port); air gateways are RUN (Saint-Denis Roland Garros). We pick whichever gives the shortest total door time for your address.

When is the busiest time on the China-Reunion lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year in January or February and Golden Week in early October. Book one to two weeks earlier in those periods.

Checking the Reunion duty position yourself

Duty and tax figures on this page are planning estimates. The binding assessment is made by Douane française (EU customs territory) against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

If you want to sanity-check a duty figure yourself, start from the heading rather than the product name — [the WCO Harmonized System](#) is the underlying nomenclature, and [the WTO Tariff & Trade Data portal](#) holds the applied rates by country pair.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

On the origin side, export declaration and any commodity inspection requirement fall under [China Customs \(GACC\)](#); we handle that filing as part of the service, but the requirement is theirs, not ours.

Watch: the process behind this route

This guide covers routing and clearance for Le Tampon. The video below covers the wider shipping process that sits around it.
