➔ Air Freight

China → Namangan · via TAS air / Kazakhstan rail · clearance by State Customs Committee of Uzbekistan

Cargo handling on the China–Namangan lane.

Freight from China into Namangan clears through TAS air / Kazakhstan rail. Namangan is Fergana valley manufacturing city, and allow +1 day for the inland leg on top of clearance.

The clearing authority is State Customs Committee of Uzbekistan. Historical dwell on this gateway is around 4–10 days, and it lengthens in Sep–Nov.

How this lane actually runs

Uzbekistan is double-landlocked, so every routing involves at least one transit country. The established path is rail through Kazakhstan; the shorter but rougher alternative is road through Kyrgyzstan on the China-Kyrgyzstan-Uzbekistan corridor via Irkeshtam. The planned CKU railway would change this materially, but today rail-via-Kazakhstan remains the dependable option.

Air gateways used	TAS (Tashkent), SKD (Samarkand)
Air transit, China to gateway	3-5 business days
Gateway serving Namangan	TAS air / Kazakhstan rail
Inland leg to Namangan	+1 day from the gateway
Typical clearance / dwell	4-10 days
Peak season to plan around	Sep-Nov

Import duty and tax position for Namangan

Imports into Uzbekistan are cleared by State Customs Committee of Uzbekistan. The headline position is: VAT 12%; customs duty 0-30%, plus excise on selected goods. The de-minimis threshold is No practical de-minimis for commercial cargo.

Conformity is the part most first-time importers underestimate: Uzstandard certificate of conformity for regulated goods. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Uzbekistan: Transit through Kazakhstan requires TIR or a bonded transit declaration. Certification and labeling in Uzbek or Russian is required for consumer goods. Currency and payment routing should be confirmed early.

Handling on the TAS air / Kazakhstan rail routing serving Namangan.

What to sort out before the cargo leaves China

- Plan around the China-side windows too: Chinese New Year and Golden Week both compress capacity on the Uzbekistan lane.
- Use ISPM-15 treated pallets. Untreated wood is the most common reason otherwise-clean cargo gets held.
- Check the de-minimis position (No practical de-minimis for commercial cargo) against your invoice value before you decide how to split the shipment.
- Declare lithium batteries, magnets, liquids and powders up front — retro-declaring after booking usually means re-planning the whole shipment.
- Budget for the inland leg: +1 day beyond gateway clearance to reach Namangan.
- Photograph carton markings and seal numbers before departure — it makes any claim far easier to settle.

Frequently asked questions

How long does shipping from China to Namangan take?

China to the Uzbekistan gateway is 3–5 business days. On top of that, allow 4–10 days of clearance with State Customs Committee of Uzbekistan and a +1 day inland leg to Namangan.

What duty and tax will I pay importing into Namangan?

State Customs Committee of Uzbekistan applies: VAT 12%; customs duty 0–30%, plus excise on selected goods. The de-minimis position is No practical de-minimis for commercial cargo. Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Namangan.

How is the chargeable weight calculated for Namangan?

We compare actual gross weight against volumetric weight — length × width × height in centimeters divided by 6000 for air — and bill the greater of the two, rounded up to the next kilogram. Light, bulky cargo is almost always billed on volume.

When is the busiest time on the China–Uzbekistan lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year in January or February and Golden Week in early October. Book one to two weeks earlier in those periods.

Which port or airport does cargo for Namangan clear through?

Cargo for Namangan is routed via TAS air / Kazakhstan rail. Sea gateways for Uzbekistan are Double-landlocked — rail transit via Kazakhstan, or road via the Irkeshtam corridor; air gateways are TAS (Tashkent), SKD (Samarkand). We pick whichever gives the shortest total door time for your address.

What certification do I need for Uzbekistan?

For regulated goods, plan for: Uzstandard certificate of conformity for regulated goods. Missing conformity paperwork is the single most common cause of a hold, and in most cases it cannot be remedied once the cargo has arrived.

Checking the Uzbekistan duty position yourself

Duty and tax figures on this page are planning estimates. The binding assessment is made by State Customs Committee of Uzbekistan against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

If you want to sanity-check a duty figure yourself, start from the heading rather than the product name — [the WCO Harmonized System](#) is the underlying nomenclature, and [the WTO Tariff & Trade Data portal](#) holds the applied rates by country pair.

On the air side, anything with a cell or a battery in it, plus liquids, powders, magnets and aerosols, is governed by [the IATA Dangerous Goods Regulations](#). Those articles are not refused outright, but they need to be declared at booking so the shipment is built correctly — declaring them late is the single most common cause of an air consignment being offloaded.

On the origin side, export declaration and any commodity inspection requirement fall under [China Customs \(GACC\)](#); we handle that filing as part of the service, but the requirement is theirs, not ours.

Watch: the process behind this route

This guide covers routing and clearance for Namangan. The video below covers the wider shipping process that sits around it.

The Customs Clearance Process: A Comprehensive Guide — ShipERP by ERP Integrated Solutions. Published on YouTube by a third party; we link it because it explains the process well, not because we produced it or endorse the provider.

Get a rate for Namangan

This lane is quoted per shipment rather than from a published rate card, because the landed cost depends on the commodity, its density, the conformity requirements above and the delivery point. Send the cargo details and we will come back with a full DDP figure.
