Rail Freight

China → Samarkand · via SKD air / Kazakhstan rail · clearance by State Customs Committee of Uzbekistan

Cargo handling on the China-Samarkand lane.

We move rail freight cargo from South China into Samarkand through SKD air / Kazakhstan rail. Samarkand is historic trading city and industrial base, which shapes the kind of cargo that moves on this lane and how it should be packed.

Clearance itself is handled by State Customs Committee of Uzbekistan, and typical dwell at the gateway runs 4–10 days.

Duty, tax and clearance into Samarkand

Imports into Uzbekistan are cleared by State Customs Committee of Uzbekistan. The headline position is: VAT 12%; customs duty 0–30%, plus excise on selected goods. The de-minimis threshold is No practical de-minimis for commercial cargo.

Conformity is the part most first-time importers underestimate: Uzstandard certificate of conformity for regulated goods. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Uzbekistan: Transit through Kazakhstan requires TIR or a bonded transit declaration. Certification and labeling in Uzbek or Russian is required for consumer goods. Currency and payment routing should be confirmed early.

How this lane actually runs

Uzbekistan is double-landlocked, so every routing involves at least one transit country. The established path is rail through Kazakhstan; the shorter but rougher alternative is road through Kyrgyzstan on the China-Kyrgyzstan-Uzbekistan corridor via Irkeshtam. The planned CKU railway would change this materially, but today rail-via-Kazakhstan remains the dependable option.

Rail / overland routing	Double-landlocked — rail transit via Kazakhstan, or road via the Irkeshtam corridor
Overland transit from China	16–24 calendar days by rail
Gateway serving Samarkand	SKD air / Kazakhstan rail
Inland leg to Samarkand	+1 day from the gateway
Typical clearance / dwell	4–10 days
Peak season to plan around	Sep–Nov

Handling on the SKD air / Kazakhstan rail routing serving Samarkand.

What to sort out before the cargo leaves China

- Confirm the consignee in Samarkand can act as importer of record — State Customs Committee of Uzbekistan will not release cargo to an unregistered party.
- Check the de-minimis position (No practical de-minimis for commercial cargo) against your invoice value before you decide how to split the shipment.
- Ask for the HS code in writing from your supplier and verify the Uzbekistan duty rate against it yourself.
- Book earlier than the transit time suggests during Sep–Nov, when space on this lane tightens.
- Use ISPM-15 treated pallets. Untreated wood is the most common reason otherwise-clean cargo gets held.
- Put the Samarkand delivery address, contact name and phone number on the invoice, not just the packing list.

Frequently asked questions

How long does shipping from China to Samarkand take?

China to the Uzbekistan gateway is 16–24 calendar days by rail. On top of that, allow 4–10 days of clearance with State Customs Committee of Uzbekistan and a +1 day inland leg to Samarkand.

What duty and tax will I pay importing into Samarkand?

State Customs Committee of Uzbekistan applies: VAT 12%; customs duty 0–30%, plus excise on selected goods. The de-minimis position is No practical de-minimis for commercial cargo. Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Samarkand.

What documents does State Customs Committee of Uzbekistan require?

A commercial invoice with HS codes, a packing list, the bill of lading or air waybill, a certificate of origin where it lowers duty, and any product certification (Uzstandard certificate of conformity for regulated goods). We prepare and file these as part of the service.

What certification do I need for Uzbekistan?

For regulated goods, plan for: Uzstandard certificate of conformity for regulated goods. Missing conformity paperwork is the single most common cause of a hold, and in most cases it cannot be remedied once the cargo has arrived.

How is the chargeable weight calculated for Samarkand?

We compare actual gross weight against volumetric weight — length × width × height in centimeters divided by 6000 for air — and bill the greater of the two, rounded up to the next kilogram. Light, bulky cargo is almost always billed on volume.

Can you ship batteries or sensitive cargo to Samarkand?

Yes. Battery cargo by air follows IATA PI 965–970 depending on how the cells are packed, and moves on certified channels via TAS (Tashkent), SKD (Samarkand). Surcharges apply and the declaration has to be made before booking.

Checking the Uzbekistan duty position yourself

Duty and tax figures on this page are planning estimates. The binding assessment is made by State Customs Committee of Uzbekistan against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Classification drives everything downstream: the same carton can attract very different duty depending on the heading it lands in, and the structure those headings come from is [the World Customs Organization Harmonized System](#). If your product sits near a boundary between two headings, resolve it before shipping rather than at the border.

Rail consignments cross several customs territories in transit rather than only at the destination, so classification errors surface mid-corridor rather than at delivery. [ITC Market Access Map](#) is worth checking for the destination heading before the block train departs, because a correction en route is far slower than one made in China.

Watch: the process behind this route

This guide covers routing and clearance for Samarkand. The video below covers the wider shipping process that sits around it.

Freight Rates to Uzbekistan

✚ Cargo Weight (KG)

☐ Enter the actual gross weight of your shipment in kilograms. If you're unsure, fill in the volume fields below and we'll calculate it for you.

☐ Or enter volume (cm) — volumetric weight ÷ 6000

× ×

Non-integers rounded up. Larger of actual vs volumetric is used.

☐ Number of Boxes

Total chargeable weight = weight per box × number of boxes.

⚠ When you have not filled in the volume information, our prices may be inaccurate.
