Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Lebanon is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

Responsibility for each shipment stage under each Incoterms rule

Term	1 Loading on truck	2 Export customs declaration	3 Carriage to port of export	4 Unloading at port of export	5 Loading on vessel / aircraft	6 Main carriage	7 Cargo insurance	8 Unloading at port of import	9 Loading on truck at import	10 Carriage to destination

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Service Details

Ningbo → Beirut Container Shipping

Full-container sea freight from China to Lebanon, Ningbo to Beirut. A whole box is the right structure once your volume passes roughly 15 CBM, or as soon as the cargo is heavy, oversized or awkward to consolidate with anyone else's — below that threshold LCL usually wins on cost, above it FCL wins on both cost per CBM and handling risk. Transit runs 18–26 days port to port port to port.

Port-to-port means exactly that: the rate ends at the Beirut terminal gate. Typical dwell at destination runs 5–12 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Rate on application. We move containers on this lane but do not publish a standing figure for it, and we would rather quote it than print a number we cannot hold. Send us the commodity, box type and required ETD and we will come back with the allocation price.

Rate by Container Type

- **20GP** — quoted on request for the current sailing
- **40HQ** — quoted on request for the current sailing

Ocean cargo on this lane discharges at [Beirut](#) and [Tripoli \(Lebanon\)](#). Which one your container routes through is decided by the sailing we book rather than by you, and it moves the inland leg far more than it moves the ocean rate, so if your consignee sits closer to one of them say so at booking and we will bias the routing that way.

Delivery does not stop at the gateway. We run inland to [Tripoli](#), [Sidon](#), [Zahle](#), [Beirut](#) and [Jounieh](#) among others, and each of those has its own destination guide covering the port or airport it clears through, the realistic inland transit to add on top of the figures

above, and the local clearance quirks worth knowing before you ship: see [all Lebanon destinations we cover](#).

Track your shipment

Enter your tracking number below

Powered by 17TRACK — supports 2,000+ carriers worldwide

```

'; return; } var pretty = res.num.substring(0,4) + ' ' + res.num.substring(4,10) + ' ' + res.num.substring(10); var who, target; if
(res.carrier) { who = 'The ' + esc(res.prefix) + ' prefix belongs to ' + esc(res.carrier.name) + ', so this box is theirs. Their
tracking page is the authoritative source for it.'; target = res.carrier; } else if (res.lessor) { who = 'The ' + esc(res.prefix) + '
prefix belongs to ' + esc(res.lessor) + ', a container leasing company rather than a shipping line. A leased box can sail with any
carrier, ' + 'so the number alone does not say who is moving it — use the universal lookup below, or check your bill of lading for the
line.'; target = FALLBACK; } else { who = 'We do not have ' + esc(res.prefix) + ' in our prefix list. The number itself is valid, ' +
'so the universal lookup below will route it to the right line.'; target = FALLBACK; } /* Always offer the universal lookups as well as
the carrier. A carrier site can be down, or simply not show a box that has not reached its network yet, and a dead end at that point
is what generates a support email. */ var alts = ''; for (var i = 0; i < FALLBACKS.length; i++) { var f = FALLBACKS[i]; if (target !==
FALLBACK && i === 0) { /* keep order, still show */ } if (f.url === target.url) { continue; } alts += '

```

- ' + esc(f.name) + ' — ' + esc(f.note) + '

```

'; } box.innerHTML = '

```

```

' + '

```

```

' + esc(pretty) + '

```

```

' + '

```

```

Check digit valid. ' + who + '

```

```

' + '

```

```

' + 'Track on ' + esc(target.name) + " + '

```

```

' + '

```

```

' + (alts ? '

```

No result there? These free lookups cover the same box from different data sources:

```
' + alts + '
': ') + '
'; /* Copy the number so the carrier's own search box is one paste away. Deliberately not a deep link: these carrier sites are SPAs
whose query parameters change without notice, and a link that quietly stops prefilling looks like a broken tracker. */ var note =
box.querySelector('[data-copy]'); if (navigator.clipboard && navigator.clipboard.writeText) {
navigator.clipboard.writeText(res.num).then(function () { note.textContent = res.num + ' copied — paste it into the tracking box
that opens.'; }, function () { note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; }); } else {
note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; } } function wire(root) { var input =
root.querySelector('.cof-ot-input'); var btn = root.querySelector('.cof-ot-btn'); var box = root.querySelector('.cof-ot-out'); if (!input ||
!btn || !box) return; function go() { var num = normalize(input.value); if (!num) { input.focus(); return; } render(box,
analyze(num)); } btn.addEventListener('click', go); input.addEventListener('keydown', function (e) { if (e.key === 'Enter') {
e.preventDefault(); go(); } }); } function init() { var nodes = document.querySelectorAll('.cof-ot'); for (var i = 0; i < nodes.length;
i++) { wire(nodes[i]); } } if (document.readyState === 'loading') { document.addEventListener('DOMContentLoaded', init); } else
{ init(); } }());
```

Track your container to Lebanon

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

Booking Conditions and Destination Requirements

What you are buying on Ningbo to Beirut is the ocean leg and nothing else: the box on the vessel, from quay to quay. Pre-carriage in China, clearance into Lebanon, duty and tax, and the final delivery run beyond Beirut are each priced separately. Ask for the door figure if you want to compare this against a DDP quote, because the two are not the same number.

- Priced per box in USD for 20GP and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Transit 18–26 days port to port port to port on Ningbo to Beirut, subject to the sailing booked
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card
- Clearance at destination is handled by Lebanese Customs Administration; the consignee must be registered to import

- Destination conformity for Lebanon: LIBNOR conformity for regulated goods; Arabic labeling for consumer products

Two things decide whether an FCL booking runs cleanly. The first is container choice: a 40HQ carries roughly 76 CBM against a 20GP's 33, so where the cargo cubes out rather than weighs out, the bigger box is usually cheaper per unit even though it costs more per booking. The second is documentation — the packing list has to match what is physically inside, because Lebanese Customs Administration inspects against the declaration rather than against intent.

Paperwork closes more shipments into Lebanon late than freight does. Invoice, packing list and any certificate of origin have to describe the same goods at the same value, and the description has to be specific enough to classify — 'electronic parts' is not a description, it is an invitation to be examined.

Where these numbers come from

Duty and tax figures on this page are planning estimates. The binding assessment is made by Lebanese Customs Administration against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Most landed-cost surprises trace back to classification rather than freight. [the WCO Harmonized System](#) defines the heading structure every customs administration builds on, and [ITC Market Access Map](#) will show you the duty a given heading attracts in this destination.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

If this is your first shipment into Lebanon, the [Lebanon Country Commercial Guide](#) covers the practical import environment in more depth than a rate page reasonably can, and it is written by a party with no stake in your booking.

China to Lebanon — Shipping Reference Data

Main sea gateways	Beirut, Tripoli (Lebanon)
Destination customs authority	Lebanese Customs Administration
De-minimis / duty-free threshold	No practical de-minimis
Import tax & duty regime	VAT 11%; customs duty 0–70% depending on commodity
Local currency	LBP
Typical clearance / dwell time	5–12 days
Peak / busy season	Sep–Nov
Conformity & certification	LIBNOR conformity for regulated goods; Arabic labeling for consumer products

Thresholds and duty bands are buyer-planning references, not formal customs rulings — confirm the exact HS-code rate for your goods before shipping.

Free 3D Loading Tools for This Sea Route

This page covers a Sea freight service from China to Lebanon. Use the matching tool below to plan your cargo before requesting a quote.

3D Container Loading Planner

Sea freight to Lebanon prices by CBM or container — plan your 20GP/40GP/40HQ loading in 3D, compare utilization, and see exactly how many cartons fit before you commit to a booking.

[Open Container Planner →](#)

Lebanon Sea Freight Checklist

- Declare accurate gross weight — VGM misdeclaration delays vessels and triggers fines.
- Check pallet vs floor-loading: floor loading typically fits 8-12% more cartons per container.
- Reserve loading space 5-7 days before the sailing cut-off for this route during peak season.
- Photograph the container number, seal, and loading process for insurance evidence.

Frequently Asked Questions

How long does Sea FCL Port-to-Port from China to Lebanon take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 5–12 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Lebanon?

Clearance is handled by Lebanese Customs Administration. The regime is: VAT 11%; customs duty 0–70% depending on commodity, with a de-minimis position of No practical de-minimis. Under DDP these are pre-paid, so nothing is collected on arrival.

When does capacity tighten on the China–Lebanon lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year (Jan/Feb) and Golden Week (early Oct). Book 1–2 weeks earlier in these periods.

Can you ship special cargo (batteries, branded goods) to Lebanon?

Yes — battery goods by sea follow UN3480/UN3481 rules with an MSDS; we prepare the dangerous-goods paperwork as part of DDP into Beirut, Tripoli (Lebanon). Surcharges apply.

What certification is needed to import into Lebanon?

For regulated goods, plan for: LIBNOR conformity for regulated goods; Arabic labeling for consumer products. Missing conformity paperwork is the most common clearance hold with Lebanese Customs Administration, so confirm requirements for your HS code before shipping.

How is the shipping cost on this route calculated?

We compare actual gross weight against volumetric weight ($L \times W \times H \div 6000$) and charge the greater, rounded up to the next kilogram, then apply the per-KG rate shown in the table above.

Inland Delivery Coverage — Lebanon

We deliver beyond the arrival gateway. Each city below has its own destination guide covering the gateway it clears through, typical inland transit time and the local customs picture.

Note — these are reference guides, not quotes. The city pages describe routing, gateways and clearance for each destination. They do not carry rate tables. For pricing to any city listed here, use the rate table on this page or ask us for a quote.
