Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Colombia is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Ningbo → Cartagena Container Shipping

Ningbo to Cartagena container shipping, priced per box rather than per CBM. This is the lane to book when the cargo fills a container or when it should not share one: machinery, stone, steel, building materials and project pieces all move better as FCL because nothing else is loaded around them. Plan on 28–38 days port to port port to port.

Port-to-port means exactly that: the rate ends at the Cartagena terminal gate. Typical dwell at destination runs 4–10 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Indicative rate. The figures below are benchmarked against current bookings on this lane group. They are a planning reference, not a firm offer — the booking rate is confirmed against the specific sailing when you enquire.

Rate by Container Type

- **40NOR** — USD 4,800 per container
- **40HQ** — USD 6,200 per container

Ocean cargo on this lane discharges at [Cartagena](#), [Buenaventura](#) and [Barranquilla](#). Which one your container routes through is decided by the sailing we book rather than by you, and it moves the inland leg far more than it moves the ocean rate, so if your consignee sits closer to one of them say so at booking and we will bias the routing that way.

Delivery does not stop at the gateway. We run inland to [Buenaventura](#), [Medellin](#), [Bogota](#), [Cali](#) and [Bucaramanga](#) among others, and each of those has its own destination guide covering the port or airport it clears through, the realistic inland transit to add on top of the figures above, and the local clearance quirks worth knowing before you ship: see [all Colombia destinations we cover](#), 8 in total.

Track your container to Colombia

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

Scope, Exclusions and What to Check Before Booking

This is a port-to-port FCL rate for Ningbo to Cartagena. It covers ocean freight for one container and stops at the Cartagena terminal gate. Everything either side of that — trucking to Ningbo, customs at both ends, duty and tax for Colombia, inland delivery — is quoted on request rather than bundled, which keeps the freight number comparable between carriers.

- Priced per box in USD for 40NOR and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Transit 28–38 days port to port port to port on Ningbo to Cartagena, subject to the sailing booked
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card

- Clearance at destination is handled by DIAN — Dirección de Impuestos y Aduanas Nacionales; the consignee must be registered to import
- Destination conformity for Colombia: INVIMA registration for food, cosmetics and medical devices; conformity certificates for regulated electricals

The most expensive mistake on a Ningbo to Cartagena booking is not the freight rate, it is free time. Demurrage and detention start counting at the Cartagena terminal whether or not your consignee is ready, and on a bad week they can exceed the ocean freight itself. Confirm how many free days the booking carries before you fix a collection date.

Before you book, confirm two things with your consignee: that they are registered to import into Colombia, and that whoever is named as importer of record accepts the duty liability. Those are dull questions and they are also the two that most often surface only after the cargo has already sailed.

Where these numbers come from

Duty and tax figures on this page are planning estimates. The binding assessment is made by DIAN — Dirección de Impuestos y Aduanas Nacionales against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Most landed-cost surprises trace back to classification rather than freight. [the WCO Harmonized System](#) defines the heading structure every customs administration builds on, and [ITC Market Access Map](#) will show you the duty a given heading attracts in this destination.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

If this is your first shipment into Colombia, the [Colombia Country Commercial Guide](#) covers the practical import environment in more depth than a rate page reasonably can, and it is written by a party with no stake in your booking.

Colombia Sea Freight Checklist

- Reserve loading space 5-7 days before the sailing cut-off for this route during peak season.
- Check pallet vs floor-loading: floor loading typically fits 8-12% more cartons per container.
- Declare accurate gross weight — VGM misdeclaration delays vessels and triggers fines.
- Ask whether the quote includes destination port charges in Colombia or only ocean freight.

Frequently Asked Questions

How long does Sea FCL Port-to-Port from China to Colombia take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 4–10 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Colombia?

Clearance is handled by DIAN — Dirección de Impuestos y Aduanas Nacionales. The regime is: IVA 19%; duty 0–20%, with a 10–40% tariff applied to some textile and footwear imports, with a de-minimis position of USD 200 for courier consignments. Under DDP these are pre-paid, so nothing is collected on arrival.

What does DDP shipping to Colombia include on this route?

DDP means one price covering freight, the duty/tax owed to DIAN — Dirección de Impuestos y Aduanas Nacionales, and last-mile delivery to your door in Colombia. There are no surprise charges at destination.

In what currency is this route priced and paid?

Freight is quoted and invoiced in USD; the destination-side currency is COP. Payment is typically due before departure, and DDP means you settle the full landed cost once.

How is the shipping cost on this route calculated?

We compare actual gross weight against volumetric weight ($L \times W \times H \div 6000$) and charge the greater, rounded up to the next kilogram, then apply the per-KG rate shown in the table above.

What certification is needed to import into Colombia?

For regulated goods, plan for: INVIMA registration for food, cosmetics and medical devices; conformity certificates for regulated electricals. Missing conformity paperwork is the most common clearance hold with DIAN — Dirección de Impuestos y Aduanas Nacionales, so confirm requirements for your HS code before shipping.
