Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Chile is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Service Details

Shanghai → Antofagasta Container Shipping

Full-container sea freight from China to Chile, Shanghai to Antofagasta. A whole box is the right structure once your volume passes roughly 15 CBM, or as soon as the cargo is heavy, oversized or awkward to consolidate with anyone else's — below that threshold LCL usually wins on cost, above it FCL wins on both cost per CBM and handling risk. Transit runs 28–38 days port to port port to port.

Port-to-port means exactly that: the rate ends at the Antofagasta terminal gate. Typical dwell at destination runs 2–6 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Indicative rate. The figures below are benchmarked against current bookings on this lane group. They are a planning reference, not a firm offer — the booking rate is confirmed against the specific sailing when you enquire.

Rate by Container Type

- **40NOR** — USD 4,800 per container
- **40HQ** — USD 6,200 per container

We move sea freight cargo for Chile through [San Antonio](#), Valparaíso and Coronel. The quoted rate covers the ocean leg to whichever of those the vessel calls at; the difference between them shows up in the trucking cost beyond the quay, which is why it pays to name the delivery city when you ask for a quote rather than just the country.

Inland coverage matters more than the port rate for most consignees. We deliver to [Concepcion](#), [San Antonio](#), [La Serena](#), [Antofagasta](#) and [Santiago](#) and beyond, and the guide for each sets out its arrival gateway, the inland days to add to the transit quoted here, and the documentation the local office actually asks for. Track your container to Chile

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

Booking Conditions and Destination Requirements

What you are buying on Shanghai to Antofagasta is the ocean leg and nothing else: the box on the vessel, from quay to quay. Pre-carriage in China, clearance into Chile, duty and tax, and the final delivery run beyond Antofagasta are each priced separately. Ask for the door figure if you want to compare this against a DDP quote, because the two are not the same number.

- Priced per box in USD for 40NOR and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Transit 28–38 days port to port port to port on Shanghai to Antofagasta, subject to the sailing booked
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card
- Clearance at destination is handled by Servicio Nacional de Aduanas de Chile; the consignee must be registered to import

- Destination conformity for Chile: SEC certification for electrical products; SAG clearance for wood packaging and agricultural goods

Two things decide whether an FCL booking runs cleanly. The first is container choice: a 40HQ carries roughly 76 CBM against a 20GP's 33, so where the cargo cubes out rather than weighs out, the bigger box is usually cheaper per unit even though it costs more per booking. The second is documentation — the packing list has to match what is physically inside, because Servicio Nacional de Aduanas de Chile inspects against the declaration rather than against intent.

Paperwork closes more shipments into Chile late than freight does. Invoice, packing list and any certificate of origin have to describe the same goods at the same value, and the description has to be specific enough to classify — 'electronic parts' is not a description, it is an invitation to be examined.

Where these numbers come from

Duty and tax figures on this page are planning estimates. The binding assessment is made by Servicio Nacional de Aduanas de Chile against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

If you want to sanity-check a duty figure yourself, start from the heading rather than the product name — [the WCO Harmonized System](#) is the underlying nomenclature, and [the WTO Tariff & Trade Data portal](#) holds the applied rates by country pair.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

On the origin side, export declaration and any commodity inspection requirement fall under [China Customs \(GACC\)](#); we handle that filing as part of the service, but the requirement is theirs, not ours.

For a wider view of how importing into Chile actually works — documentation norms, inspection behavior, the paperwork that tends to hold shipments — the [U.S. ITA guide to Chile customs regulations](#) is a useful independent read alongside our own lane notes.

China to Chile — Shipping Reference Data

Main sea gateways	San Antonio, Valparaíso, Coronel
Destination customs authority	Servicio Nacional de Aduanas de Chile
De-minimis / duty-free threshold	USD 41 for courier consignments
Import tax & duty regime	IVA 19%; general duty 6%, but 0% on most goods under the China-Chile free trade agreement with a valid certificate of origin
Local currency	CLP
Typical clearance / dwell time	2–6 days
Peak / busy season	Sep–Nov
Conformity & certification	SEC certification for electrical products; SAG clearance for wood packaging and agricultural goods

Thresholds and duty bands are buyer-planning references, not formal customs rulings — confirm the exact HS-code rate for your goods before shipping.

Chile Sea Freight Checklist

- Photograph the container number, seal, and loading process for insurance evidence.
- Check pallet vs floor-loading: floor loading typically fits 8-12% more cartons per container.
- Verify the receiver's customs import capability in Chile for DDP terms before booking.
- Declare accurate gross weight — VGM misdeclaration delays vessels and triggers fines.

Frequently Asked Questions

How long does Sea FCL Port-to-Port from China to Chile take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 2–6 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Chile?

Clearance is handled by Servicio Nacional de Aduanas de Chile. The regime is: IVA 19%; general duty 6%, but 0% on most goods under the China–Chile free trade agreement with a valid certificate of origin, with a de-minimis position of USD 41 for courier consignments. Under DDP these are pre-paid, so nothing is collected on arrival.

Which ports or airports does this route use into Chile?

Sea cargo to Chile clears through San Antonio, Valparaíso, Coronel; air freight clears via SCL (Santiago). We route through whichever gateway gives the fastest onward delivery to your address and build it into the DDP price.

What certification is needed to import into Chile?

For regulated goods, plan for: SEC certification for electrical products; SAG clearance for wood packaging and agricultural goods. Missing conformity paperwork is the most common clearance hold with Servicio Nacional de Aduanas de Chile, so confirm requirements for your HS code before shipping.

What documents are required for customs clearance in Chile?

Servicio Nacional de Aduanas de Chile typically requires a commercial invoice with HS codes, a packing list, the bill of lading/air waybill, a certificate of origin (may lower duty), and any product certification (SEC certification for electrical products; SAG clearance for wood packaging and agricultural goods). We file these under DDP.

What does DDP shipping to Chile include on this route?

DDP means one price covering freight, the duty/tax owed to Servicio Nacional de Aduanas de Chile, and last-mile delivery to your door in Chile. There are no surprise charges at destination.
