Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Romania is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Shanghai → Constanta Container Shipping

Shanghai to Constanta container shipping, priced per box rather than per CBM. This is the lane to book when the cargo fills a container or when it should not share one: machinery, stone, steel, building materials and project pieces all move better as FCL because nothing else is loaded around them. Plan on 32–42 days port to port port to port.

Port-to-port means exactly that: the rate ends at the Constanta terminal gate. Typical dwell at destination runs 3–6 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Rate on application. We move containers on this lane but do not publish a standing figure for it, and we would rather quote it than print a number we cannot hold. Send us the commodity, box type and required ETD and we will come back with the allocation price.

Rate by Container Type

- **20GP** — quoted on request for the current sailing
- **40HQ** — quoted on request for the current sailing

Ocean cargo on this lane discharges at Rotterdam, Antwerp and Hamburg. Which one your container routes through is decided by the sailing we book rather than by you, and it moves the inland leg far more than it moves the ocean rate, so if your consignee sits closer to one of them say so at booking and we will bias the routing that way.

Track your container to Romania

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

Scope, Exclusions and What to Check Before Booking

This is a port-to-port FCL rate for Shanghai to Constanta. It covers ocean freight for one container and stops at the Constanta terminal gate. Everything either side of that — trucking to Shanghai, customs at both ends, duty and tax for Romania, inland delivery — is quoted on request rather than bundled, which keeps the freight number comparable between carriers.

- Priced per box in USD for 20GP and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Transit 32–42 days port to port port to port on Shanghai to Constanta, subject to the sailing booked
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card
- Clearance at destination is handled by the national EU customs authority; the consignee must be registered to import

- Destination conformity for Romania: CE marking + IOSS for low-value parcels

The most expensive mistake on a Shanghai to Constanta booking is not the freight rate, it is free time. Demurrage and detention start counting at the Constanta terminal whether or not your consignee is ready, and on a bad week they can exceed the ocean freight itself. Confirm how many free days the booking carries before you fix a collection date.

Before you book, confirm two things with your consignee: that they are registered to import into Romania, and that whoever is named as importer of record accepts the duty liability. Those are dull questions and they are also the two that most often surface only after the cargo has already sailed.

Where these numbers come from

Duty and tax figures on this page are planning estimates. The binding assessment is made by the national EU customs authority against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Most landed-cost surprises trace back to classification rather than freight. [the WCO Harmonized System](#) defines the heading structure every customs administration builds on, and [ITC Market Access Map](#) will show you the duty a given heading attracts in this destination.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

If this is your first shipment into Romania, the [Romania Country Commercial Guide](#) covers the practical import environment in more depth than a rate page reasonably can, and it is written by a party with no stake in your booking.

China to Romania — Shipping Reference Data

Main sea gateways	Rotterdam, Antwerp, Hamburg
Destination customs authority	the national EU customs authority
De-minimis / duty-free threshold	EUR 150
Import tax & duty regime	Import VAT 17–27%; duty 0–12% by TARIC
Local currency	EUR
Typical clearance / dwell time	3–6 days
Peak / busy season	Sep–Nov
Conformity & certification	CE marking + IOSS for low-value parcels

Thresholds and duty bands are buyer-planning references, not formal customs rulings — confirm the exact HS-code rate for your goods before shipping.

Romania Sea Freight Checklist

- Check pallet vs floor-loading: floor loading typically fits 8-12% more cartons per container.
- Confirm whether your Romania rate is per CBM or per container before comparing quotes.
- Photograph the container number, seal, and loading process for insurance evidence.
- Ask whether the quote includes destination port charges in Romania or only ocean freight.

Frequently Asked Questions

How long does Sea FCL Port-to-Port from China to Romania take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 3–6 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Romania?

Clearance is handled by the national EU customs authority. The regime is: Import VAT 17–27%; duty 0–12% by TARIC, with a de-minimis position of EUR 150. Under DDP these are pre-paid, so nothing is collected on arrival.

What does DDP shipping to Romania include on this route?

DDP means one price covering freight, the duty/tax owed to the national EU customs authority, and last-mile delivery to your door in Romania. There are no surprise charges at destination.

Can you ship special cargo (batteries, branded goods) to Romania?

Yes — battery goods by sea follow UN3480/UN3481 rules with an MSDS; we prepare the dangerous-goods paperwork as part of DDP into Rotterdam, Antwerp, Hamburg. Surcharges apply.

In what currency is this route priced and paid?

Freight is quoted and invoiced in USD; the destination-side currency is EUR. Payment is typically due before departure, and DDP means you settle the full landed cost once.

How is the shipping cost on this route calculated?

We compare actual gross weight against volumetric weight ($L \times W \times H \div 6000$) and charge the greater, rounded up to the next kilogram, then apply the per-KG rate shown in the table above.

Shipping Romania cargo by industry

This rate is for the lane. What decides whether the cargo arrives intact is the commodity — how it prices, how it must be packed and loaded, and which compliance step holds it at the border. These guides cover that per industry.
