Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Pakistan is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

Responsibility for each shipment stage under each Incoterms rule

Term	1 Loading on truck	2 Export customs declaration	3 Carriage to port of export	4 Unloading at port of export	5 Loading on vessel / aircraft	6 Main carriage	7 Cargo insurance	8 Unloading at port of import	9 Loading on truck at import	10 Carriage to destination

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Service Details

Shanghai → Karachi Container Shipping

Ocean freight from China to Pakistan on a full-container basis, loading at Shanghai for discharge at Karachi. Because the rate is per container, the way to lower your cost per unit is to fill the box properly rather than to negotiate the freight — a 40HQ at 85% utilization is almost always cheaper per CBM than a 20GP packed tight. Transit is typically 14–22 days port to port.

Port-to-port means exactly that: the rate ends at the Karachi terminal gate. Typical dwell at destination runs 5–12 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Rate on application. We move containers on this lane but do not publish a standing figure for it, and we would rather quote it than print a number we cannot hold. Send us the commodity, box type and required ETD and we will come back with the allocation price.

Rate by Container Type

- **20GP** — quoted on request for the current sailing
- **40HQ** — quoted on request for the current sailing

Discharge for Pakistan on this service is at [Karachi \(KICT/QICT\)](#), [Port Qasim](#) and Gwadar. Transit time in the rate table is measured to the port, not to the door: the inland days on top depend on which gateway the box clears through and how far inland the delivery address sits.

If your delivery address is inland rather than at the port, the destination guides are the useful read: [Port Qasim](#), [Islamabad](#), [Lahore](#), [Gujranwala](#) and [Rawalpindi](#) each document their clearing gateway, typical inland transit and local customs behavior, none of which is visible in a rate table. See [all Pakistan destinations we cover](#) for the other 6.

```

' + '

```

```

' + 'Track on ' + esc(target.name) + '" + '

```

```

' + '

```

```

' + (alts ? '

```

No result there? These free lookups cover the same box from different data sources:

```
' + alts + '
': ') + '
'; /* Copy the number so the carrier's own search box is one paste away. Deliberately not a deep link: these carrier sites are SPAs
whose query parameters change without notice, and a link that quietly stops prefilling looks like a broken tracker. */ var note =
box.querySelector('[data-copy]'); if (navigator.clipboard && navigator.clipboard.writeText) {
navigator.clipboard.writeText(res.num).then(function () { note.textContent = res.num + ' copied — paste it into the tracking box
that opens.'; }, function () { note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; }); } else {
note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; } } function wire(root) { var input =
root.querySelector('.cof-ot-input'); var btn = root.querySelector('.cof-ot-btn'); var box = root.querySelector('.cof-ot-out'); if (!input ||
!btn || !box) return; function go() { var num = normalize(input.value); if (!num) { input.focus(); return; } render(box,
analyze(num)); } btn.addEventListener('click', go); input.addEventListener('keydown', function (e) { if (e.key === 'Enter') {
e.preventDefault(); go(); } }); } function init() { var nodes = document.querySelectorAll('.cof-ot'); for (var i = 0; i < nodes.length;
i++) { wire(nodes[i]); } } if (document.readyState === 'loading') { document.addEventListener('DOMContentLoaded', init); } else
{ init(); } }());
```

Track your container to Pakistan

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

What This Rate Covers — and What It Does Not

The Shanghai to Karachi rate is ocean freight, port to port, for one full container. Origin haulage to Shanghai, export declaration, destination clearance, duty and tax for Pakistan, and delivery beyond the Karachi terminal all sit outside it and are quoted on request. That split is normal for FCL, and it is why a port-to-port figure should never be compared directly against a door-to-door one.

- Priced per box in USD for 20GP and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Transit 14–22 days port to port port to port on Shanghai to Karachi, subject to the sailing booked
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card

- Clearance at destination is handled by Pakistan Customs (Federal Board of Revenue); the consignee must be registered to import
- Destination conformity for Pakistan: PSQCA standards mark for regulated goods; import against a bank contract or letter of credit for most commercial cargo

Utilization is where the real saving sits on this lane. The rate is per box, so every CBM you leave empty is money already spent — which is why it is worth planning the load before booking rather than after. On the compliance side, Pakistan Customs (Federal Board of Revenue) assesses against your declaration, so the packing list and the commercial invoice need to agree with each other and with the cargo.

Every shipment needs a commercial invoice and a packing list that agree with each other, plus destination certification where the commodity requires it. The most common cause of delay we see is not the freight at all — it is a declared value or a goods description that does not match what is in the cartons, which turns a routine clearance into an inspection.

Where these numbers come from

Duty and tax figures on this page are planning estimates. The binding assessment is made by Pakistan Customs (Federal Board of Revenue) against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Classification drives everything downstream: the same carton can attract very different duty depending on the heading it lands in, and the structure those headings come from is [the World Customs Organization Harmonized System](#). If your product sits near a boundary between two headings, resolve it before shipping rather than at the border.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

For a wider view of how importing into Pakistan actually works — documentation norms, inspection behavior, the paperwork that tends to hold shipments — the [U.S. ITA guide to Pakistan customs regulations](#) is a useful independent read alongside our own lane notes.

China to Pakistan — Shipping Reference Data

Main sea gateways	Karachi (KICT/QICT), Port Qasim, Gwadar
Destination customs authority	Pakistan Customs (Federal Board of Revenue)
De-minimis / duty-free threshold	No practical de-minimis
Import tax & duty regime	Sales tax 18%; customs duty 3–20% plus additional customs duty and regulatory duty on many consumer lines; withholding income tax on imports
Local currency	PKR
Typical clearance / dwell time	5–12 days
Peak / busy season	Sep–Nov
Conformity & certification	PSQCA standards mark for regulated goods; import against a bank contract or letter of credit for most commercial cargo

Thresholds and duty bands are buyer-planning references, not formal customs rulings — confirm the exact HS-code rate for your goods before shipping.

Free 3D Loading Tools for This Sea Route

This page covers a Sea freight service from China to Pakistan. Use the matching tool below to plan your cargo before requesting a quote.

3D Container Loading Planner

Maximize every CBM on this route: load your carton list into the 3D container planner, check space and payload utilization, and download the loading plan for your forwarder.

[Open Container Planner →](#)

Pakistan Sea Freight Checklist

- Ask whether the quote includes destination port charges in Pakistan or only ocean freight.
- Declare accurate gross weight — VGM misdeclaration delays vessels and triggers fines.
- Verify the receiver's customs import capability in Pakistan for DDP terms before booking.
- Photograph the container number, seal, and loading process for insurance evidence.

Frequently Asked Questions

How long does Sea FCL Port-to-Port from China to Pakistan take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 5–12 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Pakistan?

Clearance is handled by Pakistan Customs (Federal Board of Revenue). The regime is: Sales tax 18%; customs duty 3–20% plus additional customs duty and regulatory duty on many consumer lines; withholding income tax on imports, with a de-minimis position of No practical de-minimis. Under DDP these are pre-paid, so nothing is collected on arrival.

Which ports or airports does this route use into Pakistan?

Sea cargo to Pakistan clears through Karachi (KICT/QICT), Port Qasim, Gwadar; air freight clears via KHI (Karachi), LHE (Lahore), ISB (Islamabad). We route through whichever gateway gives the fastest onward delivery to your address and build it into the DDP price.

When does capacity tighten on the China–Pakistan lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year (Jan/Feb) and Golden Week (early Oct). Book 1–2 weeks earlier in these periods.

Can you ship special cargo (batteries, branded goods) to Pakistan?

Yes — battery goods by sea follow UN3480/UN3481 rules with an MSDS; we prepare the dangerous-goods paperwork as part of DDP into Karachi (KICT/QICT), Port Qasim, Gwadar. Surcharges apply.

What certification is needed to import into Pakistan?

For regulated goods, plan for: PSQCA standards mark for regulated goods; import against a bank contract or letter of credit for most commercial cargo. Missing conformity paperwork is the most common clearance hold with Pakistan Customs (Federal Board of Revenue), so confirm requirements for your HS code before shipping.

Inland Delivery Coverage — Pakistan

We deliver beyond the arrival gateway. Each city below has its own destination guide covering the gateway it clears through, typical inland transit time and the local customs picture.

Note — these are reference guides, not quotes. The city pages describe routing, gateways and clearance for each destination. They do not carry rate tables. For pricing to any city listed here, use the rate table on this page or ask us for a quote.
