Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Japan is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

Responsibility for each shipment stage under each Incoterms rule

Term	1 Loading on truck	2 Export customs declaration	3 Carriage to port of export	4 Unloading at port of export	5 Loading on vessel / aircraft	6 Main carriage	7 Cargo insurance	8 Unloading at port of import	9 Loading on truck at import	10 Carriage to destination

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Service Details

Shanghai → Moji Container Shipping

Ocean freight from China to Japan on a full-container basis, loading at Shanghai for discharge at Moji. Because the rate is per container, the way to lower your cost per unit is to fill the box properly rather than to negotiate the freight — a 40HQ at 85% utilization is almost always cheaper per CBM than a 20GP packed tight. Transit is typically 10–16 days port to port.

Port-to-port means exactly that: the rate ends at the Moji terminal gate. Typical dwell at destination runs 1–3 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Indicative rate. The figures below are benchmarked against current bookings on this lane group. They are a planning reference, not a firm offer — the booking rate is confirmed against the specific sailing when you enquire.

Rate by Container Type

- **20GP** — USD 405 per container
- **40HQ** — USD 770 per container

Ocean cargo on this lane discharges at [Tokyo](#), [Yokohama](#) and [Osaka](#). Which one your container routes through is decided by the sailing we book rather than by you, and it moves the inland leg far more than it moves the ocean rate, so if your consignee sits closer to one of them say so at booking and we will bias the routing that way.

Delivery does not stop at the gateway. We run inland to [Yokohama](#), [Osaka](#), [Yokkaichi](#), [Sapporo](#) and [Saitama](#) among others, and each of those has its own destination guide covering the port or airport it clears through, the realistic inland transit to add on top of the figures above, and the local clearance quirks worth knowing before you ship: see [all Japan destinations we cover](#), 16 in total.

```

' + '

```

```

' + 'Track on ' + esc(target.name) + " " + '

```

```

' + '

```

```

' + (alts ? '

```

No result there? These free lookups cover the same box from different data sources:

```
' + alts + '
': ') + '
'; /* Copy the number so the carrier's own search box is one paste away. Deliberately not a deep link: these carrier sites are SPAs
whose query parameters change without notice, and a link that quietly stops prefilling looks like a broken tracker. */ var note =
box.querySelector('[data-copy]'); if (navigator.clipboard && navigator.clipboard.writeText) {
navigator.clipboard.writeText(res.num).then(function () { note.textContent = res.num + ' copied — paste it into the tracking box
that opens.'; }, function () { note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; }); } else {
note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; } } function wire(root) { var input =
root.querySelector('.cof-ot-input'); var btn = root.querySelector('.cof-ot-btn'); var box = root.querySelector('.cof-ot-out'); if (!input ||
!btn || !box) return; function go() { var num = normalize(input.value); if (!num) { input.focus(); return; } render(box,
analyze(num)); } btn.addEventListener('click', go); input.addEventListener('keydown', function (e) { if (e.key === 'Enter') {
e.preventDefault(); go(); } }); } function init() { var nodes = document.querySelectorAll('.cof-ot'); for (var i = 0; i < nodes.length;
i++) { wire(nodes[i]); } } if (document.readyState === 'loading') { document.addEventListener('DOMContentLoaded', init); } else
{ init(); } }());
```

Track your container to Japan

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

What This Rate Covers — and What It Does Not

The Shanghai to Moji rate is ocean freight, port to port, for one full container. Origin haulage to Shanghai, export declaration, destination clearance, duty and tax for Japan, and delivery beyond the Moji terminal all sit outside it and are quoted on request. That split is normal for FCL, and it is why a port-to-port figure should never be compared directly against a door-to-door one.

- Priced per box in USD for 20GP and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Transit 10–16 days port to port port to port on Shanghai to Moji, subject to the sailing booked
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card
- Clearance at destination is handled by Japan Customs; the consignee must be registered to import

- Destination conformity for Japan: PSE mark for electrical appliances; Giteki/MIC certification for radio devices; Food Sanitation Act notification for food-contact items

Utilization is where the real saving sits on this lane. The rate is per box, so every CBM you leave empty is money already spent — which is why it is worth planning the load before booking rather than after. On the compliance side, Japan Customs assesses against your declaration, so the packing list and the commercial invoice need to agree with each other and with the cargo.

Every shipment needs a commercial invoice and a packing list that agree with each other, plus destination certification where the commodity requires it. The most common cause of delay we see is not the freight at all — it is a declared value or a goods description that does not match what is in the cartons, which turns a routine clearance into an inspection.

Where these numbers come from

Every duty and tax figure quoted on this page is our working estimate for planning, not a ruling. The binding rate for your consignment is whatever [Japan Customs](#) applies against your declared HS code on the day of entry, and their published guidance is the source to check before you commit stock.

Most landed-cost surprises trace back to classification rather than freight. [the WCO Harmonized System](#) defines the heading structure every customs administration builds on, and [ITC Market Access Map](#) will show you the duty a given heading attracts in this destination.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

For a wider view of how importing into Japan actually works — documentation norms, inspection behavior, the paperwork that tends to hold shipments — the [U.S. ITA guide to Japan customs regulations](#) is a useful independent read alongside our own lane notes.

China to Japan — Shipping Reference Data

Main sea gateways	Tokyo, Yokohama, Osaka
Destination customs authority	Japan Customs (国境)
De-minimis / duty-free threshold	JPY 10,000 customs value (some categories excluded)
Import tax & duty regime	Consumption tax 10%; duty 0–15% on most manufactured goods, higher on leather, footwear and food
Local currency	JPY
Typical clearance / dwell time	1–3 days
Peak / busy season	Sep–Nov
Conformity & certification	PSE mark for electrical appliances; Giteki/MIC certification for radio devices; Food Sanitation Act notification for food-contact items

Thresholds and duty bands are buyer-planning references, not formal customs rulings — confirm the exact HS-code rate for your goods before shipping.

Free 3D Loading Tools for This Sea Route

This page covers a Sea freight service from China to Japan. Use the matching tool below to plan your cargo before requesting a quote.

3D Container Loading Planner

Sea freight to Japan prices by CBM or container — plan your 20GP/40GP/40HQ loading in 3D, compare utilization, and see exactly how many cartons fit before you commit to a booking.

[Open Container Planner →](#)

Japan Sea Freight Checklist

- Photograph the container number, seal, and loading process for insurance evidence.
- Check pallet vs floor-loading: floor loading typically fits 8-12% more cartons per container.
- Verify the receiver's customs import capability in Japan for DDP terms before booking.
- Reserve loading space 5-7 days before the sailing cut-off for this route during peak season.

Frequently Asked Questions

How long does Sea FCL Port-to-Port from China to Japan take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 1–3 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Japan?

Clearance is handled by Japan Customs (関税). The regime is: Consumption tax 10%; duty 0–15% on most manufactured goods, higher on leather, footwear and food, with a de-minimis position of JPY 10,000 customs value (some categories excluded). Under DDP these are pre-paid, so nothing is collected on arrival.

Which ports or airports does this route use into Japan?

Sea cargo to Japan clears through Tokyo, Yokohama, Osaka; air freight clears via NRT (Narita), HND (Haneda), KIX (Osaka Kansai). We route through whichever gateway gives the fastest onward delivery to your address and build it into the DDP price.

In what currency is this route priced and paid?

Freight is quoted and invoiced in USD; the destination-side currency is JPY. Payment is typically due before departure, and DDP means you settle the full landed cost once.

When does capacity tighten on the China–Japan lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year (Jan/Feb) and Golden Week (early Oct). Book 1–2 weeks earlier in these periods.

What documents are required for customs clearance in Japan?

Japan Customs (関税) typically requires a commercial invoice with HS codes, a packing list, the bill of lading/air waybill, a certificate of origin (may lower duty), and any product certification (PSE mark for electrical appliances; Giteki/MIC certification for radio devices; Food Sanitation Act notification for food-contact items). We file these under DDP.

Inland Delivery Coverage — Japan

We deliver beyond the arrival gateway. Each city below has its own destination guide covering the gateway it clears through, typical inland transit time and the local customs picture.

Note — these are reference guides, not quotes. The city pages describe routing, gateways and clearance for each destination. They do not carry rate tables. For pricing to any city listed here, use the rate table on this page or ask us for a quote.
