Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Philippines is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Shekou → Manila North Container Shipping

Ocean freight from China to Philippines on a full-container basis, loading at Shekou for discharge at Manila North. Because the rate is per container, the way to lower your cost per unit is to fill the box properly rather than to negotiate the freight — a 40HQ at 85% utilization is almost always cheaper per CBM than a 20GP packed tight.

Port-to-port means exactly that: the rate ends at the Manila North terminal gate. Typical dwell at destination runs 4–9 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Rate by Container Type

- **20GP** — USD 40.00 per container
- **40HQ** — USD 80.00 per container

We move sea freight cargo for Philippines through [Manila \(MICT and South Harbor\)](#), [Cebu](#) and [Davao](#). The quoted rate covers the ocean leg to whichever of those the vessel calls at; the difference between them shows up in the trucking cost beyond the quay, which is why it pays to name the delivery city when you ask for a quote rather than just the country.

Inland coverage matters more than the port rate for most consignees. We deliver to [Quezon City](#), [Pampanga](#), [Subic Bay](#), [Laguna](#) and [Baguio](#) and beyond, and the guide for each sets out its arrival gateway, the inland days to add to the transit quoted here, and the documentation the local office actually asks for. You can browse [all Philippines destinations we cover](#), 13 destinations in total.

Track your container to Philippines

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

What This Rate Covers — and What It Does Not

The Shekou to Manila North rate is ocean freight, port to port, for one full container. Origin haulage to Shekou, export declaration, destination clearance, duty and tax for Philippines, and delivery beyond the Manila North terminal all sit outside it and are quoted on request. That split is normal for FCL, and it is why a port-to-port figure should never be compared directly against a door-to-door one.

- Priced per box in USD for 20GP and 40HQ, not per KG or per CBM — utilization is yours to optimize
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card
- Clearance at destination is handled by Bureau of Customs (BOC); the consignee must be registered to import

- Destination conformity for Philippines: BPS Import Commodity Clearance for regulated products; FDA license for food, cosmetics and devices; NTC for radio equipment

Utilization is where the real saving sits on this lane. The rate is per box, so every CBM you leave empty is money already spent — which is why it is worth planning the load before booking rather than after. On the compliance side, Bureau of Customs (BOC) assesses against your declaration, so the packing list and the commercial invoice need to agree with each other and with the cargo.

Every shipment needs a commercial invoice and a packing list that agree with each other, plus destination certification where the commodity requires it. The most common cause of delay we see is not the freight at all — it is a declared value or a goods description that does not match what is in the cartons, which turns a routine clearance into an inspection.

Where these numbers come from

Treat the landed-cost numbers here as a planning baseline. [Philippine Bureau of Customs](#) sets the rate that actually gets charged, assessed against your HS classification at the moment of clearance, so their own guidance is worth reading before a large order.

If you want to sanity-check a duty figure yourself, start from the heading rather than the product name — [the WCO Harmonized System](#) is the underlying nomenclature, and [the WTO Tariff & Trade Data portal](#) holds the applied rates by country pair.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

On the origin side, export declaration and any commodity inspection requirement fall under [China Customs \(GACC\)](#); we handle that filing as part of the service, but the requirement is theirs, not ours.

For a wider view of how importing into Philippines actually works — documentation norms, inspection behavior, the paperwork that tends to hold shipments — the [U.S. ITA guide to Philippines customs regulations](#) is a useful independent read alongside our own lane notes.

China to Philippines — Shipping Reference Data

Main sea gateways	Manila (MICT and South Harbor), Cebu, Davao

Frequently Asked Questions

How long does Sea FCL Port-to-Port (Spot) from China to Philippines take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 4–9 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Philippines?

Clearance is handled by Bureau of Customs (BOC). The regime is: VAT 12%; duty 0–30%, with ACFTA preference available on a Form E, with a de-minimis position of PHP 10,000. Under DDP these are pre-paid, so nothing is collected on arrival.

Which ports or airports does this route use into Philippines?

Sea cargo to Philippines clears through Manila (MICT and South Harbor), Cebu, Davao; air freight clears via MNL (Manila), CEB (Cebu), CRK (Clark). We route through whichever gateway gives the fastest onward delivery to your address and build it into the DDP price.

In what currency is this route priced and paid?

Freight is quoted and invoiced in USD; the destination-side currency is PHP. Payment is typically due before departure, and DDP means you settle the full landed cost once.

Can you ship special cargo (batteries, branded goods) to Philippines?

Yes — battery goods by sea follow UN3480/UN3481 rules with an MSDS; we prepare the dangerous-goods paperwork as part of DDP into Manila (MICT and South Harbor), Cebu, Davao. Surcharges apply.

How is the shipping cost on this route calculated?

We compare actual gross weight against volumetric weight ($L \times W \times H \div 6000$) and charge the greater, rounded up to the next kilogram, then apply the per-KG rate shown in the table above.
