Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to Peru is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Service Details

Tianjin → Callao Container Shipping

Full-container sea freight from China to Peru, Tianjin to Callao. A whole box is the right structure once your volume passes roughly 15 CBM, or as soon as the cargo is heavy, oversized or awkward to consolidate with anyone else's — below that threshold LCL usually wins on cost, above it FCL wins on both cost per CBM and handling risk.

Port-to-port means exactly that: the rate ends at the Callao terminal gate. Typical dwell at destination runs 3–8 days before the box is available for collection, and that window sits outside the transit figure above. Origin haulage, export declaration, destination clearance, duty and delivery beyond the terminal are all quoted separately, so ask for a door figure if that is what you are comparing against.

Rate by Container Type

- **40HQ** — quoted on request for the current sailing

Discharge for Peru on this service is at [Callao](#), [Chancay](#) and [Paita](#). Transit time in the rate table is measured to the port, not to the door: the inland days on top depend on which gateway the box clears through and how far inland the delivery address sits.

If your delivery address is inland rather than at the port, the destination guides are the useful read: [Chiclayo](#), [Lima](#), [Paita](#), [Trujillo](#) and [Callao](#) each document their clearing gateway, typical inland transit and local customs behavior, none of which is visible in a rate table. See [all Peru destinations we cover](#) for the other 3.

Track your container to Peru

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

Booking Conditions and Destination Requirements

What you are buying on Tianjin to Callao is the ocean leg and nothing else: the box on the vessel, from quay to quay. Pre-carriage in China, clearance into Peru, duty and tax, and the final delivery run beyond Callao are each priced separately. Ask for the door figure if you want to compare this against a DDP quote, because the two are not the same number.

- Priced per box in USD for 40HQ, not per KG or per CBM — utilization is yours to optimize
- Heavy and out-of-gauge cargo is core traffic here: machinery, steel, stone, building materials, project pieces
- Cut-off and free time attach to the specific sailing; demurrage begins the day free time expires
- Reefer, dangerous goods and out-of-gauge are priced case by case rather than from the card
- Clearance at destination is handled by SUNAT — Superintendencia Nacional de Aduanas; the consignee must be registered to import

- Destination conformity for Peru: Certificate of origin for FTA preference; DIGEMID or DIGESA registration for health and food products

Two things decide whether an FCL booking runs cleanly. The first is container choice: a 40HQ carries roughly 76 CBM against a 20GP's 33, so where the cargo cubes out rather than weighs out, the bigger box is usually cheaper per unit even though it costs more per booking. The second is documentation — the packing list has to match what is physically inside, because SUNAT — Superintendencia Nacional de Aduanas inspects against the declaration rather than against intent.

Paperwork closes more shipments into Peru late than freight does. Invoice, packing list and any certificate of origin have to describe the same goods at the same value, and the description has to be specific enough to classify — 'electronic parts' is not a description, it is an invitation to be examined.

Where these numbers come from

Duty and tax figures on this page are planning estimates. The binding assessment is made by SUNAT — Superintendencia Nacional de Aduanas against your declared HS code at the time of entry; where the amount is material, verify the current rate through [ITC Market Access Map](#) before committing to an order.

Classification drives everything downstream: the same carton can attract very different duty depending on the heading it lands in, and the structure those headings come from is [the World Customs Organization Harmonized System](#). If your product sits near a boundary between two headings, resolve it before shipping rather than at the border.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

If this is your first shipment into Peru, the [Peru Country Commercial Guide](#) covers the practical import environment in more depth than a rate page reasonably can, and it is written by a party with no stake in your booking.

Peru Sea Freight Checklist

- Photograph the container number, seal, and loading process for insurance evidence.
- Check pallet vs floor-loading: floor loading typically fits 8-12% more cartons per container.
- Declare accurate gross weight — VGM misdeclaration delays vessels and triggers fines.
- Ask whether the quote includes destination port charges in Peru or only ocean freight.

Frequently Asked Questions

How long does Sea FCL Port-to-Port (Spot) from China to Peru take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 3–8 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into Peru?

Clearance is handled by SUNAT — Superintendencia Nacional de Aduanas. The regime is: IGV 18%; duty 0–11%, with 0% on most goods under the China–Peru free trade agreement, with a de-minimis position of USD 200 for courier consignments. Under DDP these are pre-paid, so nothing is collected on arrival.

What does DDP shipping to Peru include on this route?

DDP means one price covering freight, the duty/tax owed to SUNAT — Superintendencia Nacional de Aduanas, and last-mile delivery to your door in Peru. There are no surprise charges at destination.

What certification is needed to import into Peru?

For regulated goods, plan for: Certificate of origin for FTA preference; DIGEMID or DIGESA registration for health and food products. Missing conformity paperwork is the most common clearance hold with SUNAT — Superintendencia Nacional de Aduanas, so confirm requirements for your HS code before shipping.

When does capacity tighten on the China–Peru lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year (Jan/Feb) and Golden Week (early Oct). Book 1–2 weeks earlier in these periods.

Can you ship special cargo (batteries, branded goods) to Peru?

Yes — battery goods by sea follow UN3480/UN3481 rules with an MSDS; we prepare the dangerous-goods paperwork as part of DDP into Callao, Chancay, Paita. Surcharges apply.
