Trade Terms Explained — Who Pays for What

The rate above is quoted on one specific trade term. Change the term and you change how much of the journey to United States is already inside the price. The table below maps the eleven common Incoterms® against the twelve cost stages of a door-to-door shipment, so you can see exactly where our responsibility ends and yours begins.

- **Seller** — Cost and arrangement sit with the seller / shipper.
- **Buyer** — Cost and arrangement sit with the buyer / consignee.
- **Negotiable** — Not fixed by the rule — agree it in the contract.

Responsibility for each shipment stage under each Incoterms rule

EXW Ex Works

Buyer takes over at the seller's door and carries every cost from there. Lowest quoted price, highest buyer workload.

FCA Free Carrier

Seller clears the goods for export and hands them to the carrier the buyer nominated.

FAS Free Alongside Ship

Sea and inland waterway only. Seller delivers alongside the vessel; loading is on the buyer.

FOB Free On Board

Sea and inland waterway only. Risk passes once the goods are on board. The most common buying term.

CFR Cost and Freight

Seller pays the main carriage but carries no insurance obligation; risk still passes on loading.

CIF Cost, Insurance and Freight

As CFR, plus the seller must buy and pay for cargo insurance (minimum cover unless you agree more).

CPT Carriage Paid To

Any mode. Seller pays carriage through to the named destination; insurance is not obligatory.

CIP Carriage and Insurance Paid

As CPT, plus the seller must insure the cargo through to the named destination.

DAT Delivered At Terminal (DPU)

Seller delivers unloaded at the named terminal. Renamed DPU (Delivered at Place Unloaded) in Incoterms® 2020.

DAP Delivered At Place

Seller delivers to your address ready for unloading; import clearance and duty stay with the buyer.

DDP Delivered Duty Paid

Seller carries everything through to your door, duty and tax included. Highest quoted price, least buyer workload.

Two things worth flagging. Under CIF and CIP the seller is obliged to buy cargo insurance and pay the premium; under every other term insurance is optional, and we recommend buyers arrange their own cover so a loss or damage in transit is recoverable. And this table is a working summary for planning purposes — the binding definitions are the ones published by the International Chamber of Commerce in the Incoterms® rules, so confirm the exact term wording in your sales contract before you ship.

Service Details

China → United States LA OA - Door Delivery

Shipping from China to United States by sea freight, priced per CBM or per KG, whichever bills higher. The tiers below are the live rate card for this channel; they move with the market, so the refresh date under the table is the date the numbers were last confirmed rather than the date the page was built.

Cargo on this service moves through Los Angeles/Long Beach, New York/Newark and Savannah. The rate covers the leg to the discharge port; inland delivery beyond the quay is costed against the delivery address, not the country. Expect 2-5 days of dwell at destination before release.

This rate is freight only. Import charges for United States are assessed separately on arrival — No federal VAT; duty 0-6.5% by HTS code — and whoever is named as importer of record is liable for them. If you would rather have one all-in number, ask us for the duty-paid version of this lane.

Space on this lane tightens through Aug-Oct, which is peak season for United States. Rates published outside that window are not a reliable guide to what you will pay inside it, so if your order lands in peak, book earlier rather than budgeting from an off-peak figure.

Current Rate Card

- **12+** — USD 12.14 per KG
- **50+** — USD 11.13 per KG
- **101+** — USD 8.61 per KG

Last refreshed 2026-08-06.

Ocean cargo on this lane discharges at Los Angeles/Long Beach, New York/Newark and Savannah. Which one your container routes through is decided by the sailing we book rather than by you, and it moves the inland leg far more than it moves the ocean rate, so if your consignee sits closer to one of them say so at booking and we will bias the routing that way.

If you already know roughly what you are moving, skip the rate maths. The [100 KG](#), [300 KG](#) and [500 KG](#) pages apply this tariff to a fixed consignment and show the result, including the point where stepping up a tier lowers your cost per kilo. The [China to United States Sea Freight Cost](#) page sets this channel against the alternatives, and [shipping from China to United States](#) is the full destination guide.

```

'; } box.innerHTML = '

```

```

' + '

```

```

' + esc(pretty) + '

```

' + '

Check digit valid. ' + who + '

' + '

' + 'Track on ' + esc(target.name) + " + '

' + '

' + (alts ? '

No result there? These free lookups cover the same box from different data sources:

' + alts + '

': "') + '

/* Copy the number so the carrier's own search box is one paste away. Deliberately not a deep link: these carrier sites are SPAs whose query parameters change without notice, and a link that quietly stops prefilling looks like a broken tracker. */ var note = box.querySelector('[data-copy]'); if (navigator.clipboard && navigator.clipboard.writeText) { navigator.clipboard.writeText(res.num).then(function () { note.textContent = res.num + ' copied — paste it into the tracking box that opens.'; }, function () { note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; }); } else { note.textContent = 'Copy ' + res.num + ' and paste it into the tracking box that opens.'; } } function wire(root) { var input = root.querySelector('.cof-ot-input'); var btn = root.querySelector('.cof-ot-btn'); var box = root.querySelector('.cof-ot-out'); if (!input || !btn || !box) return; function go() { var num = normalize(input.value); if (!num) { input.focus(); return; } render(box, analyze(num)); } btn.addEventListener('click', go); input.addEventListener('keydown', function (e) { if (e.key === 'Enter') { e.preventDefault(); go(); } }); } function init() { var nodes = document.querySelectorAll('.cof-ot'); for (var i = 0; i < nodes.length; i++) { wire(nodes[i]); } } if (document.readyState === 'loading') { document.addEventListener('DOMContentLoaded', init); } else { init(); } }());

Track your container to United States

Ocean cargo is tracked by container number, not by a parcel barcode. Enter yours below: we check it is a valid number, identify the line that owns it, and take you straight to that line's tracking page for this ocean service.

Container number

A container number is four letters and seven digits, for example MSKU6090510. The last digit is a check digit, so a typo can be caught here rather than by an empty result on the carrier's site. We validate it in your browser — the number is not sent to us or to anyone else.

Additional Information

Booking Conditions and Destination Requirements

LCL cargo on this lane bills on the greater of weight and volume, so a dense pallet and a light bulky one of the same size do not cost the same. Past roughly 15 CBM it is worth asking us for an FCL comparison — a full container usually undercuts consolidation at that point, and it removes the co-loading risk that comes with sharing a box.

- General commercial cargo. Battery, magnetic, liquid and powder content must be declared at booking, not on arrival
- Rates are quoted against the current sailing or departure; peak-season surcharges apply where the carrier levies them
- Routing on this lane is via Los Angeles/Long Beach, New York/Newark and Savannah — inland delivery beyond that point is quoted against the delivery address
- Clearance at destination is handled by U.S. Customs and Border Protection (CBP)
- United States de-minimis: USD 800 — commercial consignments sit above it and are dutiable in full
- Destination conformity: FCC for radio devices; FDA Prior Notice for food/supplements

On the duty side, the applicable regime is: No federal VAT; duty 0–6.5% by HTS code. Those are planning references rather than a ruling: the rate that binds is the one assessed against your declared HS code at the moment of entry, and classification is where most landed-cost surprises actually originate.

Paperwork closes more shipments into United States late than freight does. Invoice, packing list and any certificate of origin have to describe the same goods at the same value, and the description has to be specific enough to classify — 'electronic parts' is not a description, it is an invitation to be examined.

Where these numbers come from

Every duty and tax figure quoted on this page is our working estimate for planning, not a ruling. The binding rate for your consignment is whatever [U.S. Customs and Border Protection](#) applies against your declared HS code on the day of entry, and their published guidance is the source to check before you commit stock.

Most landed-cost surprises trace back to classification rather than freight. [the WCO Harmonized System](#) defines the heading structure every customs administration builds on, and [ITC Market Access Map](#) will show you the duty a given heading attracts in this destination.

For ocean cargo, restricted commodities move under [the IMO's IMDG Code](#), and the container has to be declared and stowed accordingly. Batteries, flammables and corrosives all have a compliant ocean path; what causes rolled bookings is finding out about them after the container is packed.

China to United States — Shipping Reference Data

Main sea gateways	Los Angeles/Long Beach, New York/Newark, Savannah
Destination customs authority	U.S. Customs and Border Protection (CBP)
De-minimis / duty-free threshold	USD 800
Import tax & duty regime	No federal VAT; duty 0–6.5% by HTS code
Local currency	USD
Typical clearance / dwell time	2–5 days
Peak / busy season	Aug–Oct
Conformity & certification	FCC for radio devices; FDA Prior Notice for food/supplements

Thresholds and duty bands are buyer-planning references, not formal customs rulings — confirm the exact HS-code rate for your goods before shipping.

United States Sea Freight Checklist

- Reserve loading space 5-7 days before the sailing cut-off for this route during peak season.
- Verify the receiver's customs import capability in United States for DDP terms before booking.
- Ask whether the quote includes destination port charges in United States or only ocean freight.
- Photograph the container number, seal, and loading process for insurance evidence.

Frequently Asked Questions

How long does LA OA – Parcel Delivery from China to United States take?

Sea freight on this route runs about 25–45 calendar days door-to-door, plus roughly 2–5 days of clearance/dwell once it reaches the gateway. All times include customs clearance under DDP terms.

What duties and taxes apply when importing into United States?

Clearance is handled by U.S. Customs and Border Protection (CBP). The regime is: No federal VAT; duty 0–6.5% by HTS code, with a de-minimis position of USD 800. Under DDP these are pre-paid, so nothing is collected on arrival.

Can you ship special cargo (batteries, branded goods) to United States?

Yes — battery goods by sea follow UN3480/UN3481 rules with an MSDS; we prepare the dangerous-goods paperwork as part of DDP into Los Angeles/Long Beach, New York/Newark, Savannah. Surcharges apply.

In what currency is this route priced and paid?

Freight is quoted and invoiced in USD; the destination-side currency is USD. Payment is typically due before departure, and DDP means you settle the full landed cost once.

What certification is needed to import into United States?

For regulated goods, plan for: FCC for radio devices; FDA Prior Notice for food/supplements. Missing conformity paperwork is the most common clearance hold with U.S. Customs and Border Protection (CBP), so confirm requirements for your HS code before shipping.

What documents are required for customs clearance in United States?

U.S. Customs and Border Protection (CBP) typically requires a commercial invoice with HS codes, a packing list, the bill of lading/air waybill, a certificate of origin (may lower duty), and any product certification (FCC for radio devices; FDA Prior Notice for food/supplements). We file these under DDP.
